

# MCG 60A 240V PULL-OUT STYLE AIR CONDITIONING DISCONNECT

#MAC-DNS60

## Enhanced Safety and Convenience with Optimized AC Performance

### Specifications:

- Electrical Rating: 60A
- Voltage Rating: 240V
- Disconnect Type: Pull-out style
- Durable and corrosion-resistant materials
- Width: 5" Height: 7-1/2" Depth: 2-1/4"
- Mount to wall using suitable screws or anchors

### Applications include but are not limited to:

- Homes and apartments
- Office buildings and commercial spaces
- Retail stores and shopping centres
- Industrial facilities
- Hospitality and entertainment venues

**High Electrical Capacity:** Rated at 60A/240V, this disconnect ensures ample capacity for optimal performance with diverse air conditioning systems.

**Pull-Out Design:** Allows easy, quick power disconnection for the AC unit, providing a convenient means to shut down power when necessary.

**Durable Build:** Constructed from robust steel, this disconnect is designed to endure challenging environments, ensuring long-lasting reliability.

**Safety Feature:** The pull-out disconnect mechanism guarantees a secure power disconnection, preventing accidental contact during maintenance. The pull-out portion can be rotated and stored for safe work on the HVAC unit while fully de-energized.

**Compact Design:** Space-efficient and streamlined, this disconnect is suitable for limited-space installations, offering flexible mounting options for easy integration.
